4h sliding window	Not applied	512/128
1w sliding window	Not applied	256/64
4w sliding window	50	64/16

Usage volumes calculated by download + upload.

Between the hours of 2300pm GMT and 0500am GMT any usage consumed will account to 50% of actual consumption. I.E. usage accumulating to 3 GB will only use 1.5 GB of your actual allowance.

It is advisable to set any updates for this time so not to disrupt usage during the day.
